University of the Pacific, Stockton, CA

Bachelors of Science in Computer Engineering

Expected Grad Date, 2028

San Joaquin Delta College, Stockton, CA

Associate in Science (AS) in Math and Science

Graduated with Honors, 2024

Professional Experience

City of Stockton, Stockton, CA

IT Support Desk Intern

July 2025 - March 2026

- Image and deploy computers across city departments, Install and configure desktops, laptops, monitors, printers, and phones.
- Coordinate with the CoS network team to clear port security for devices, prepare reports/guides, and train new hires.
- Work with partners like Telcion, Palo Alto Networks, Quest Software, and Intune. Manage logs and monitor UEM systems and SIEM with Azure and Active Directory.
- Perform secure hard drive wipes for disposal or reuse and cloud software integration.
- Provide remote support and resolve technical issues via support tickets through ServiceNow, used Bomgar, Cisco Finesse, and KACE.

Computer Pros, Stockton, CA

IT Technician Intern

June 2024 - Aug 2024

- Led strategic upgrades for partners like Pacific Home Care, enhancing network performance and reducing downtime by 20%.
- Delivered top-notch support, resolving customer issues on the first contact, significantly improving customer satisfaction.
- Utilized network interfaces to implement security updates and optimize processes.

San Joaquin Delta College, Stockton, CA

Biology Lab Aide Intern

March 2024 - Aug 2024

- Implemented GHS and lab safety procedures, contributing to a reduction in lab accidents and enhancing the overall safety.
- Ensured 100% operational readiness of autoclaves and other lab equipment through diligent maintenance and operation.
- Played a key role in preparing various media for biological experiments, supporting the success of over 50 student labs.

Projects / Skills

EasyReview

April 2026

Built a full-stack automation tool that integrates Quickbooks API and automates SMS review requests, replacing a paid SaaS product at near-zero cost for a local business client. Sent over 300 messages a month, implemented Supabase, Next.js, and Playwright automation.

University of the Pacific Hackathon - TigerTrack

April 2026

Built TigerTrack, an AI-powered course planning tool using real DegreeWorks data to generate personalized graduation paths and an AI advisor chatbot, earning 2nd place at PacificHacks.

Pi Hole DNS Server

January 2026

Configured a Raspberry Pi with a custom-built enclosure to install a Pi-hole DNS server, successfully integrating it into the home network.

Lawrence Livermore National Labs STEM San Joaquin

October 2024

Volunteered at University of the Pacific for a STEM outreach workshop hosted by LLNL for students in San Joaquin County.

Worked with LLNL employees to guide students through the process of dismantling, identifying, and rebuilding computers.

Formula SAE Club project

Spring 2024 - Fall 2025

Utilized CAD software to design and build components such as a dash plate/ecu mount for my university FSAE team.
