Education

University of the Pacific, Stockton, CA | B.S. in Computer Science — *Expected Grad: December 2027*
San Joaquin Delta College, Stockton, CA | A.S. in Math and Science — *Graduated with Honors, 2024*

Technical Skills

Python | JavaScript / TypeScript | C++ | SQL | Next.js | PostgreSQL / Supabase | Firebase | Git & GitHub Actions | Playwright | REST APIs | Vercel | Linux | RAG Pipelines | Agentic AI | MCP Tools & Servers | LLM API Integration (Anthropic, Groq, OpenAI-compatible) | Vector Knowledge Bases | Prompt Engineering | Penetration Testing | Kali Linux | Nmap | Metasploit | Wireshark | John the Ripper | OSINT | SIEM / UEM | Azure | Active Directory | Intune

Professional Experience

California Department of Justice, Sacramento, CA - *IT Student Assistant* — *August 2026 - Present*
- Keep criminal justice and national records queryable for California law enforcement through the CLETS Datacenter, monitoring 16+ databases and the circuits linking DOJ to agencies, hospitals, school districts, and county and city governments under CJIS access control requirements.
- Catch and escalate circuit failures to the telecom carriers, filing outage notifications every two hours until resolution, and take routine UPS readings to surface anomalies early.

University of the Pacific, Stockton, CA - *AI Research Assistant* — *September 2026 - Present*
- Research AI tooling and adoption models for Pacific's university-wide AI Strategic Planning Initiative, mapping the AI skills needed across academic and administrative units.
- Draft sections of the strategic assessment report spanning curriculum, operations, research, ethics and compliance, and infrastructure, for the Office of Research & Sponsored Programs.

City of Stockton, Stockton, CA - *IT Support Desk Intern* — *July 2025 - February 2026*
- Monitored UEM and SIEM through Azure and Active Directory and cleared Palo Alto port security with the network team, across 8+ city departments including Police, Fire, Municipal Utilities, Public Works, and the Corp Yard.
- Imaged and deployed endpoints, performed secure drive wipes and BitLocker encryption, and resolved tickets in ServiceNow.

Computer Pros, Stockton, CA - *IT Technician Intern* — *June 2024 - Aug 2024*
- Reduced client network downtime 20% by leading infrastructure upgrades, including for Pacific Home Care.
- Implemented security updates and reconfigured network processes across client sites, resolving most issues on first contact.

Projects

TigerTrack - *Co-Founder* — *2026 - Present*
- AI academic planning platform for universities. One of three co-founders, owning the retrieval pipeline and data layer: indexed 988+ courses and DegreeWorks audit data into a RAG pipeline behind a context-aware advisor chatbot (Groq, LLaMA 3.3 70B). Greenlit by UOP administration for API integration; 30+ students in the pilot.

EasyReview - Automated Review Pipeline — *April 2026*
- Replaced a paid SaaS for a local business with a full-stack tool on Next.js, TypeScript, and Supabase (PostgreSQL), sending 300+ SMS review requests a month through a QuickBooks API and Playwright cron pipeline.

CyberPartner - AI Pentesting & OSINT Terminal Tool — *2026*
- Command-line security assistant (Python, Textual TUI) automating recon and OSINT: chains crt.sh certificate data, Hunter.io email patterns, and nmap service enumeration, then uses an LLM to write an analyst-style report.

Network Penetration Test - ECPE 178 (Network Security) — *April 2026*
- Full pentest of a hardened VM from Kali: mapped the attack surface with nmap, exploited an UnrealIRCd backdoor (CVE-2010-2075) via Metasploit, chained a Docker group misconfiguration to root, then cracked the MD5-crypt hashes.

Lawrence Livermore National Labs STEM San Joaquin - *Volunteer* — *October 2024*
- Guided K-12 students through dismantling, identifying, and rebuilding computers at a UOP STEM outreach workshop hosted by LLNL.
